## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claim 1, the phrase "especially" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "especially"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 5,449,544 to Ogawa et al.

Regarding claim 1, Ogawa discloses an extruded weather strip having a base body (fig. 2: WI) having a sealing portion (3) made of a first elastomeric material and a fastening portion (2 & 7) made from a second elastomeric material with a cellular (sponge) and rubber structure, and an adhesive surface (6). Regarding the coextruded limitation, even though product-by-process claims are limited by and defined by the

process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.

Regarding claim 2, Ogawa discloses the second material (the materials which form the adhesion body, 2 & 7) as being sponge rubber and extruded rubber. Sponge rubber being cellular.

Regarding claim 3, Ogawa discloses the first material (3) as being EPDM (ethylene-propylene diene rubber. Column 2, lines 33-37).

Regarding claim 4, Ogawa discloses the use of an adhesive, wherein tack is an inherent property of adhesives.

Regarding claim 5, Ogawa discloses a peel off film on the adhesive (43).

Regarding claim 6, Ogawa discloses the adhesion body contact surface as being on a plane different from that of the fastening portion (fig. 1).

Regarding claim 7, Ogawa discloses a fastening lip (5) on the adhesion body.

Regarding claim 8, Ogawa discloses a hollow chamber in the sealing portion (fig. 1: where number 8 is located).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited patents listed on the included form PTO-892 further show the state of the art with respect to weather seals in general.
